Sales Optimizer .....	2

## Sage Accpac Options for Sage Pro ERP

### ACCPAC Query

#### **Easy-to-use report generator delivers informative business data in minutes.**

With its user-friendly design, ACCPAC Query makes report writing a snap for even inexperienced users. ACCPAC Query uses a simple wizard interface that lets you select a report from a list, select the sort order and filter conditions, and direct the output to a printer, disk file, spreadsheet, screen preview or other output. In addition to running pre-defined reports, you can create your own quick reports in just minutes. Simply select which fields to report on from the list of available fields (full English descriptions, not cryptic names or symbols), and ACCPAC Query does the rest! The Professional Edition allows for complete control over the look and feel of reports using the Advanced Report Designer. The Runtime Edition allows users to only run reports, but not create them.

### Business Analysis Suite

#### **ACCPAC CFO (Comprehensive Financial Optimizer)**

#### **Essential tools for businesses interested in improving their strategic method of financial analysis.**

ACCPAC CFO™ is a financial diagnostic and strategic analysis tool that begins where your General Ledger and traditional financial reports end. CFO is an interactive solution that provides you with a one page financial scorecard, providing key information and indicators on what drives your business. This simple to use package provides you with a unique approach to interpreting financial data.

ACCPAC CFO allows you to:

- Perform "What If Scenarios"
- Perform Goal Seeking"
- Create a Budget or Forecast report-The Roll Forward function enables you to create a budget or forecast in two keystrokes.
- Analyze a new business contract, customer, product or another New Opportunity.
- Combine next year's budget with a new opportunity.
- Instantly evaluate, forecast and implement strategic business decisions to achieve your desired results.

ACCPAC CFO is integrated with your Sage Accpac ERP and Sage Pro ERP General Ledger so there is no rekeying of information.

## **ACCPAC KPI (Key Performance Indicator)**

ACCPAC KPI is an add-on module that enhances ACCPAC CFO by enabling detailed comparisons between financial models, the addition of user-specific variables and benchmarking of results with data from prior years or similar organizations.

With ACCPAC KPI you can:

- Create your own performance measures.
- Compare actual performance with budget and forecast numbers.
- Create forecasts for as many as 20 years.
- Develop company-to-company comparisons.
- Develop benchmarks and long-term financial strategies.
